### ABOUT

Observant and detail-oriented aspiring full-stack developer with a specialization in MERN stack. Self-motivated and curious, with a keen interest in building user-centric products. Looking forward to honing my skills in a challenging work environment.

### PROJECTS

#### GRADIGI

**Internship At Masai Labs, Mar 2023 - Apr 2023**

Gradigi is a web platform designed to assist in grading live presentations and interviews. The platform has two roles: Admin and User, each with specific features.

#### **Features:**

- Simple and consistent UI
- Admin can add presentation and assign admin for review
- As a user, you can easily see which presentations are scheduled for you, so that you can prepare accordingly.
- Google-like calendar UI to keep track of upcoming events.
- Pagination for managing long lists.

#### **Tech-Stack:**

React | Redux | MUI | Java | MySQL | Spring Boot | JWT

#### **Area of responsibility:**

- Create a UI for the admin and user where the admin can schedule a presentation and assign a reviewer for the presentation.
- Create a UI for the reviewer and user where they can see scheduled presentations. The reviewer can give a grade to the presentation, and the user can see the results. ---

#### MASAI PLACEMENT PORTAL

**Internship At Masai Labs, Feb 2023 - Mar 2023**

Masai Placement Portal is a Masai Build and Earn Project. We will build a website where the Placement team can bring companies from different sources and update their information on the portal so that students can apply according to their skill sets.

#### **Features:**

- Simple and consistent UI
- Admin and student panels are available as per the requirements
- Secure app with email verification and JWT Token
- Detailed information about the company and position to answer students' questions
- Optimization techniques for fast response loading
- Pagination for managing long lists

#### **Tech-Stack:**

React | Redux | Ant Design | Node | Express | Santry | Redis

#### **Area of responsibility:**

- Creating a modal for adding companies and a multi-step form for adding positions
- Create a Company and Position Table as well as a description Page. ---
