ABOUT

Observant and detail-oriented aspiring full-stack developer with a specialization in MERN stack. Self-motivated and curious, with a keen interest in building user-centric products. Looking forward to honing my skills in a challenging work environment.

PROJECTS

MASAI PLACEMENT PORTAL

Masai Placement Portal is the Masai Build and Earn Project. We will build a website where the Placement team will bring companies from different sources and update them on the portal so that students can apply according to their skill sets.

Features:
- Simple and consistent UI.
- Admin and student panel available as per requirements.
- Secure app with email verification and JWT Token.
- Multiple Details about the company and position to clear students' required questions.
- The optimization technique makes fast response loading.
- Pagination For Managing Long List.

Tech-Stack:
React | Redux | Ant Design | Node | Express | Santry | Redis

Area of responsibility:
- Create a Company and Position Modal and multi-form respectively.
- Create a Company and Position Table as well as a description Page.

———

FRONT-END MASTERS

Frontend Master is a web application to provide courses to master front-end skills.

Features
- Sign-in/Sign-up
- Update user details
- Learning Paths

Tech-Stack:
HTML | CSS | Javascript | ES6

Areas of responsibility
- Different Courses to explore
- Learning Path page where users can choose their learning course
